BALTIMORE SUBSTANCE ABUSE SYSTEMS SELECTS CYTO

Columbia, Maryland – Baltimore Substance Abuse Systems, Inc., (BSAS), the non-profit organization that directs the City’s efforts against the harmful effects of drug and alcohol abuse, today chose Cyto Communications to develop its new corporate identity and provide additional organizational communications services. Each year, BSAS manages some \$50 million in grants which fund a network of care providers to City residents.

“We’re honored to be invited to help BSAS as it continues to strengthen its presence and very positive impact throughout the community,” said Cyto Communications managing partner John Phelan.
